

JACK ECONOMOS

PROFESSIONAL SUMMARY

Innovative and creative entrepreneur with a background in cardiac physiology, game development, marketing, business administration, change management and disruptive technologies, focused on creating value and offering cutting-edge solutions in the crypto gaming space. Known as a driven, influential figure who understands the value of growing a brand rooted in loyal communities. With a solid understanding of industry trends and latest technologies, as well as a passion NFTs/cryptocurrencies, I aim to dismantle the complexity of the Web3 space into practical, understandable, and fun concepts that could enrich the player experience. As founder of a blockchain gaming studio, my goal is to stay on top of what's next in culture, recognising trends, market shifts and consumer behaviour.

WORK HISTORY

Co-Founder & CEO, 2021 - Current

Matrix Studios (matrixstudios.io)

- Founded a blockchain gaming studio with the goal of forming long-standing partnerships and creating an outstanding experience for players and enthusiasts of this emerging industry.
- Aligned organisational capabilities with the studio's long-term mission and values while developing and delivering scalable, repeatable, and transferable management processes and tools.
- Cultivated a team-oriented culture to attract, motivate, and retain a diverse, talented collection of staff with blended skillsets to drive programmatic excellence and overall performance.
- Emerged as a thought leader by representing the company externally and fostered robust relationships with industry professionals and influencers.
- Formed an elite-level corporate sponsorship with the St Kilda Football Club, as well as a business partnership with our game developers 'Art of Play Games' and released our first play-and-earn gaming title 'Kill Kount', a retro-inspired 16-bit beat 'em up, whilst in early-stage development of another AAA-inspired title.
- Launched the MTX token and created a community of over 5,200 token holders, with 1,8 mil AUD in volume traded since September 2021.
- Provide exceptional technical design and thought leadership while working with developers, product managers, project teams, functional and technical analysts to design solution architecture.

Lead Cardiac Physiologist, 2014 - 2023

GenesisCare - Centre for cardiology

- Managed a team of Cardiac Physiologists to ensure optimal patient care is delivered every day through the appropriate rostering of staff, maintenance of cardiac monitoring/testing equipment and liaising with fellow cardiologists, suppliers and vendors.
- Performed a range of diagnostic cardiac investigations at highly specialist cardiac physiologist level and provided expert, clinically accurate reports, adhering to local and national guidelines.
- Contributed to the strategic development and daily operational management of the department and worked collaboratively with other professionals as needed.
- Provided training to all relevant members of the team in the delivery of routine and complex cardiac investigations.
